**Excavation Unit 2
Block 7, Lot 1
Overlain on Magnetic Gradient Survey**

Figure 10, Geophysics at New Philadelphia Site, 2004-2006

Excavation Unit 2 in Block 7, Lot 1, was placed over an area with a high distribution of surface artifacts and displaying an anomaly near a large white and black dipole in the southeastern corner of Block 7, Lot 1 in the data map above. That excavation unit uncovered Feature 3, which consists of stone foundation remains of a late-nineteenth century house.
